PUBLICATIONS

of

H. Blaine Lawson, Jr.

[22] Scalar curvature, non-abelian group actions, and the degree of symmetry of exotic spheres (with Shing Tung Yau), Commentarii Mathematici Helvetici 49 (1974), 232-244.
Extended minimal varieties (with F.R. Harvey), Inventiones Mathematicae 28 (1975), 209-226.

The stable homology of a flat torus, Mathematica Scandinavica 36 (1975), 49-73.

Non-existence, non-uniqueness and irregularity of solutions to the minimal surface system (with Robert Osserman), Acta Mathematica 139 (1977), 1-17.

On boundaries of complex analytic varieties, II (with F. Reese Harvey), Annals of Mathematics 106 (1977), 213-238.

Stability and gap phenomena for Yang-Mills fields (with Jean-Pierre Bourguignon and James Simons), Proceedings of the National Academy of Sciences of the USA 76 (1979), 1550-1553.

Geometries associated to the group SU(n) and varieties of minimal submanifolds arising from the Cayley arithmetic (with Reese Harvey), pp. 43-59 in “Minimal Submanifolds and Geodesics”, Kaigai Publications, Tokyo, 1978.

Thurston’s work on foliations, Notices of the A. M. S. 76 (1979), 294-295.

[51] Embedding and surrounding with positive mean curvature (with M.L. Michelsohn), Inventiones Math. 77 (1984), 399-419.

[53] Approximation by positive mean curvature immersions; Frizzing (with M.L. Michelsohn), Inventiones Math. 77 (1984), 421-426.

[57] Complex analytic geometry and measure theory (with R. Harvey), Proc. of Symp. in Pure Math. 44 (1986), 261-274.

Algebraic cycles and infinite loop spaces (with C. Boyer, P. Lima-Filho, B. Mann, M.-L. Michelsohn), Inventiones Math. 113 (1993), 373-388.

A theory of characteristic currents associated with a singular connection (with R. Harvey), Bull. A.M.S. 31 (1994), 54-64.

Algebraic cycles and the classical groups, I, The real case (with P. Lima-Filho and M.-L. Michelsohn), Topology 42 (2003), 467-506.

Relations to geometry and topology via the Index Theorem, pp. 117-144 in “Dirac Operators, Yesterday and Today”, International Press, Somerville, Massachusetts, 2005.

Plurisubharmonicity in a general geometric context, (with R. Harvey), Geometry and Analysis 1 (2010), 363-401. ArXiv:0804.1316

[134] Lagrangian potential theory in symplectic geometry, (with R. Harvey).

[135] Pluriharmonics in general potential theories, (with R. Harvey).
