

On Halloween 2011, there was a midterm in MAT364. A copy of the midterm is available [here](#), and the solutions (written by Christina Lueth based on discussion in class), are available [here](#).

A grade of below 40 on this midterm is not a good grade. A good grade is above 60; an OK grade is in the 40–60 range. Most people earned either good grades or not good grades; a few got OK grades.
