ETCHED GLASS SIGNAGE PROPOSAL

SCOPE OF PROJECT

Having incorporated the equations of physicists employed by the Simons Center with great success to previous art projects I would like to continue that theme in a more ambitious and permanent addition to the Simons Center. I have designed three glass panels which again use the physicist's equations as a decorative element blended with timeless geometric motifs inspired by the legendary designer David Hicks. By employing my geometric pattern on frosted, etched glass it creates a 'tailored' effect to the cafeteria, intended to complement the architecture rather than using a more distracting representational art piece. As a design element, the repetition of my design makes the viewer comfortable by the calming, logical and predictable influence geometric pattern typically has on a room. The subtle use of equations within pattern is my artistic tribute to the work of the physicists and mathematicians who use the space daily.

The three glass panels would be a quarter inch thick, mounted with steel pegs from the wall and potentially back lit for a more dramatic effect. I am only using a frosted against transparent treatment on un-tinted glass to keep the panels viewed as a whole clean and simple, complementing the grey wall and neutral tones throughout the cafeteria.

ESTIMATED COMPLETION DATE:

3-5 days for pattern and equations to be converted to Vector AI or EPS
2 weeks for fabrication of glass
1 week for the addition of LED lighting
1 week for shipping and installation

Approximately 5 weeks from approval to begin project.

CONSTRUCTION COST:

Subcontracting fee for graphic designer to properly insert equations into my design and prepare finished images (subject to the board's approval) as Vector files sent to Impact Glass: \$400 a day, 3-4 days anticipated. Total: \$1,600

1/4" thick etched glass panel

1.75 x 3.5 feet each, Qty 3

Reverse etched logo

(4) stain less steel stand offs for installation

Total - \$1786 EACH

Add for LED lighted rails for edge lighting - \$775 EACH

Crating - \$150

Shipping - \$400

Installation – \$500 (sub contractor's fee)

Project and Coordination Oversight fee: \$3,300

Total cost: \$13,633

50% deposit required at initiation of project.

Thank you so much for considering this project. I am greatly looking forward to contributing my design to the Simons Center which I'm sure will be appreciated by all who view it.

Best,
Miriam Carothers
