

## About this course

This course, MAP 102/103 (Proficiency Algebra), is an overview of school algebra. It covers algebraic expressions (in particular, exponents, polynomials and rational expressions), linear and quadratic equations and inequalities, graphing lines and parabolas, solving systems of linear equations, solving word problems.

This course contains 31 Video Lectures (written by Julia Viro and narrated by Thomas Rico and Stephanie Lamb) with transcripts, and homeworks with answer key and solutions.

The textbook is Lynn Marecek, *Intermediate Algebra*, OpenStax.
