Please generally attend the lecture you are registered for. If you are unable to attend a class in the lecture you are registered for or would like to see a specific topic again, you may attend another lecture; however, due to space limitations, the students registered in any given lecture and arriving on time will have priority. On the other hand, please free to attend *any* of the office hours.

Additional help is available through the Math Learning Center,

<http://www.math.sunysb.edu/MLC>,

located in Math S-240A and staffed by math grad students and faculty, as well as through the Residential Tutoring Centers

http://studentaffairs.stonybrook.edu/res/rtc/courses_tutored.jsp,

staffed by undergraduate students who have mastered 100-level courses. The morning hours at MLC are usually less popular and thus the staff are more likely to be able to devote more attention to each student.

Due to the size of the class, it will not be possible for the lecturers and the graders to respond to every e-mail. Before sending an e-mail with an administrative question (e.g. about exam locations), please check to see if it is answered in one of the course handouts, on the course website, or available through the Stony Brook University pages. If this is the case, you are unlikely to receive any response; if your question is answered in the *Frequently Asked Questions* handout, you will **not** receive a response. Please do not e-mail mathematical questions (e.g. how to do a specific problem); instead please come to office hours.

There will be occasional adjustments to the above office hours, especially during weeks with long weekends. These will be posted on the course website.
