

5. (expires 2/20) Consider the planar curve γ defined by $x^2y^3 + y^2 + y - 2e^x = 0$. Using **only** Maple, find the slope of the tangent line to the curve at $(0, 1)$. Then plot the curve and the tangent line on the same graph.
Hint: you might want to use `implicitplot` from the library `plots`. You might find `implicitdiff` helpful, too.
6. (expires 2/20) Define a Maple function g that, given a positive integer k yields the sum of the first k primes. What is k such that $g(k) \leq 100,000$ but $g(k + 1) > 100,000$? You might find `sum` and `ithprime` helpful.
7. (expires 2/20) Use the Maclaurin series for $\arctan x$ (that is, the Taylor series about $x = 0$) evaluated at $x = 1/\sqrt{3}$ to compute the value of π to 30 places. How many terms are needed to compute the value to 50 places?
8. (expires 2/20) Use Maple to make pictures of the following pasta.

Here are some relevant equations, in no particular order.

$$z = \sin(2y) \left(1 - e^{-(x/6)^8}\right) \quad -6 \leq x \leq 6, \quad -20 \leq y \leq 20$$

$$\tau = 1 \quad 0 \leq \phi \leq \pi, \quad -\pi \leq \sigma \leq \pi \quad (\text{toroidal coordinates})$$

$$x = \left(1 + \frac{\cos(s)}{2}\right) \cos(t) \quad y = \left(1 + \frac{\cos(s)}{2}\right) \sin(t) \quad z = 0.4t + \frac{\sin(s)}{2} \quad \begin{array}{l} 0 \leq s \leq 2\pi \\ \frac{\pi}{2} \leq t \leq \frac{11\pi}{2} \end{array}$$

$$\left\{ \begin{array}{l} x = r \sin(t) \quad y = r \cos(t) \quad z = t/2 \\ x = r \sin\left(t + \frac{2\pi}{3}\right) \quad y = r \cos\left(t + \frac{2\pi}{3}\right) \quad z = t/2 \\ x = r \sin\left(t - \frac{2\pi}{3}\right) \quad y = r \cos\left(t - \frac{2\pi}{3}\right) \quad z = t/2 \end{array} \right. \quad \begin{array}{l} 0 \leq r \leq 1 \\ 0 \leq t \leq 4\pi \end{array}$$

$$6 \leq r \leq 7 + \sin(20\theta)/2, \quad 0 \leq \theta \leq 2\pi, \quad 0 \leq z \leq 14 \quad (\text{cylindrical coordinates})$$

To help you get started, the Maple worksheet called [pasta.mw](#) draws Mezzi Rigatoni. For full credit, your pasta should look like pasta, with appropriate coloring, viewpoint, smoothness, and lighting. Sauce is optional.
